Education

- **National University Of Science and Technology (NUST)** Islamabad
Bachelors in Computer Engineering *Sep 2019 - Oct 2023*
- **Public School And College** Gilgit
Faculaty Of Science *Aug 2015 - July 2017*
- **Public School And College** Gilgit
Secondary School Certificate *March 2013 - July 2015*

Skills Summary

- **Languages & Markups:** JavaScript, HTML, CSS, Python, SQL, C++, C-Sharp, MATLAB
- **Tools, Frameworks & Libraries:** React js, Node js, Bootstrap, Tailwind CSS, Numpy, Matplotlib, MYSQL, Excel, Visual Studio, Linux, Unity

Experience

- **AKSA SDS | Backend Developer Intern (Node.js)** April 2024 - Present
 - Worked on developing and optimizing backend services using Node.js and Express. I implemented rate limiting for APIs, built and maintained microservices, and handled database operations including CRUD functionalities and query optimization. I also collaborated with cross-functional teams to ensure seamless integration and contributed to the performance and scalability of backend systems.
- **DevStorm | Front-End Web Development Intern** Feb 2024 - April 2024
 - During my web development internship, I buffed my skills in designing and implementing responsive and user-friendly web applications. Collaborating with a dynamic team, Implementing the front-end projects using React js, CSS and Node js. Ensuring seamless aid to the technical team.

Academic Projects

- **Mobile Application for real time Facial Expression Recognition(Final Year Project):** Developed a mobile app that was built in Flutter and ML for training the model with the provided data set. The aim of the App was using facial expression recognition to interact with users through their camera, recognizing facial expressions. The expressions recorded are then saved to aid psychiatrists for analysis and aiding to the treatment and general health of patient and deriving relation between the facial expressions recorded and its resultant effect to the patient's profile.
- **A Movie Information WebApp like IMDB :** Created a React.js-based website utilizing the TMDB (The Movie Database) API. The platform enables users to access detailed movie information, including ratings, synopses, and other relevant data. Additionally, it features dedicated sections for Popular, Top Rated, and Upcoming movies, enhancing user experience with easy navigation and comprehensive movie details.
- **E-Commerce Shopping App using React :** Developed a fully functional E-Commerce App, with a flawless grid display and item description, with the functionalities of adding and removing from cart and managing the total price of items to be purchased according to the number of items to be purchased.

- **Weather App using React:** Developed a website using Open Weather API to create an app that tells about the temperature, humidity and wind speed of the area selected, also providing the user with the visuals for each condition of temperature, humidity and wind speed .
- **Task managing App using React (2023):** Created a visually appealing App to manage tasks, adding and removing tasks and setting priorities and reminders. creating visual feedback response for the tasks that have been completed.
- **2D Game (2020):** Developed an exciting 2D game using Blender for the graphical design and unity for development, where the player must navigate and avoid falling objects as they move forward. The game starts with a moderate speed and gradually increases in difficulty, challenging the player's reflexes and agility.

Achievements

- **Extracurricular: President** at Trekking Club.
- **Extracurricular: Director** at Nawaye Saroosh

Certifications

- **Coursera:** Completed a Coursera course titled 'Introduction to Front-End Web Development.' Throughout the course, I gained knowledge about the Front End concepts, learned Java Scripts, CSS & HTML, understood the basics of front end design, learned about DOM and to develop simple projects.
- **Coursera:** Successfully completed the course titled "Advanced React Js" specialization, a comprehensive program covering key concepts and practical skills in the libraries that React encapsulates and understanding the concepts of component based development, state management, hooks and responsive design.
