About Me

Highly skilled software engineer with 2+ years of experience in Flutter development for Android, iOS, and the Web, together with 2 to 3 months of hands-on experience in Node.js for back-end development. Proficient in integrating third-party SDKs, managing complex mobile and web functionalities, and ensuring seamless cross-platform performance. Dedicated to building high-performance applications and optimizing user experiences through efficient, scalable front-end and back-end solutions.

EDUCATION

University of Loralai, Balochistan

2018 – 2022

Bachelor of Science in Computer Science

3.69/4 CGPA

SKILLS

- Flutter
- Dart
- APIs Integration
- Google Maps
- Google ads
- State Management (Provider, Getx, BLoc)
- Responsive Design
- Local Databases (Hive, SharedPreferences)
- Payment Methods (Stripe Payment, Mollie Payment Method)
- Firebase
- Firestore
- Realtime Database
- Web Sockets/sockets.io
- ZegoCloud (Audio, Video Calling)

EXPERIENCE

Alright Tech Private Limited 

Dec 2022 - Till Now

Role - Flutter Developer

- Expertise in building cross-platform mobile applications using Flutter. Proficient with state management solutions such as Provider, GetX, and Bloc. Skilled in creating custom widgets, UI/UX design, and implementing responsive layouts.
- Strong command of Dart, including asynchronous programming, streams, error handling, and efficient memory management.
- Experienced in integrating RESTful APIs, handling JSON data, and utilizing tools like Postman for API testing and debugging.
- Proficient in Firebase Authentication, Firestore, Cloud Functions, and Cloud Messaging for backend services and real-time data synchronization.
- Experienced with Git for version control, including branching, merging, pull requests, and resolving conflicts.
- Adept at creating intuitive, visually appealing user interfaces with a focus on user experience, custom animations, and accessibility.
- Familiar with popular Flutter packages such as Dio, Retrofit, and Flutter SVG, to enhance app functionality.
- Skilled in using local storage solutions like SharedPreferences, Hive, and Flutter Secure Storage for data persistence.
- Knowledgeable in MVVM, MVC, and Clean Architecture patterns, ensuring scalable and maintainable codebases.

PROJECTS

MyNoona | Flutter, Dart APIs, Google Maps, AI Chat

- A user-friendly app designed to help foreigners explore South Korean culture, food, language, and lifestyle
- Includes a social module for sharing blogs and personal experiences.
- Offers video courses on Korean food, language, restaurants, and local customs.
- Integrated a custom AI chat assistant that provides South Korea-specific guidance.
- Integrated the Google map, for the easily access to the famous places.
- [APK Available] – Contact via WhatsApp or email for access.

ListNBuy | Flutter, Dart APIs, Stripe Payment Method

- Buy and sell products and browse products by category
- Chat with sellers and make secure payments
- Save items for later

YFitness | Flutter, Dart, RestFull APIs,)

- All-in-one fitness app
- Wide range of features and tools
- Connect with friends and track fitness progress

Diet Doctor Family (DDF) | Flutter, Dart, RestFull APIs, Audio, Video Calling

- Holistic health and nutrition app.
- Connect with certified diet doctors and schedule appointments
- Personalized health journey

FileShare | Flutter, Dart, RestFull APIs

- Massive storage
- Subscription-based service and download and share files
- Organize files into folders and subfolders
- [APK Available] – Contact via WhatsApp or email for access.

Beard Friend (Still in progress) | Flutter, Dart, Mollie Payment Method, RestFull APIs

- A platform connecting barbers, hairdressers, and beard enthusiasts to share knowledge and showcase grooming skills.
- Features contests for users to demonstrate beard grooming expertise, with winners receiving prizes from admins.
- Offers beard-related merchandise, grooming products, and secure payment system (Mollie Payment Method)
- Includes internationalization and location-based barbershop search.
- [APK Available] – Contact via WhatsApp or email for access.

RandomImageViewer | My Latest Package on pub.dev

- Supports Multiple Image Formats Display images in various formats with full compatibility: Vector and Raster Images: SVG, PNG, JPG, JPEG Animated and Web Optimized: GIF, WebP High-Quality and Professional Formats: BMP, TIFF, ICO, HEIC Network and Local Image Handling
- Fully Customizable Modify appearance with: Height and Width (responsive sizing) BoxFit Options (contain, cover, fill, etc.) Borders and Border Radius (for rounded images) Alignment and Margins (for positioning)
- Optimized Performance with Caching Uses CachedNetworkImage for efficient network image caching Reduces redundant loading and improves performance

TECHNICAL SKILLS

Languages: Dart, Node

Frameworks: Flutter, NodeJS

Developer Tools: Android Studio, XCode, VS Code, Postman, Figma

CERTIFICATIONS

- Gold Medal
- Flutter - Udemy

EXTRACURRICULAR

- Taught basic C++ in University of Loralai
