Professional Summary

Dedicated and enthusiastic BS Data Science student with a strong foundation in programming, data visualization, and AI technologies. Skilled in Python, JavaScript, React, and databases, with hands-on experience in large language models (LLMs) and generative AI. Adept at using advanced visualization tools like Tableau and D3.js to convey complex data insights. Seeking opportunities to leverage technical skills in a dynamic, innovative environment.

Education

BS Data Science Student | FAST University

Expected Graduation: 2026

Experience

Intern – EUC Department

Easypaisa | July 2025 – September 2025

- Worked with Active Directory and Microsoft Exchange for account management and system administration.
- Assisted in system patching, upgrading, and virtual machine (VM) deployment in enterprise environments.
- Gained hands-on exposure to AWS, Azure, Docker, and Kubernetes while collaborating with the Cloud and DevOps teams.
- Learned fundamental network administration practices through collaboration with the Network team.
- Strengthened skills in infrastructure management, cloud services, and containerization technologies

Frontend Developer Intern

Moqah.pk | March 2025 – June 2025

- Assisting in building and maintaining responsive user interfaces using React.js and Tailwind CSS.
- Collaborating with UI/UX and backend teams to integrate frontend with APIs.
- Debugging components and improving performance for a seamless user experience.

Research Intern – AI & LLMs

UrduX Company | July 2024 – August 2024

- Researched Large Language Models (LLMs) and Generative AI applications.
- Worked on integrating AI tools into production-level systems with a focus on scalability and usability.

Projects

Data Visualization

- Built interactive charts and dashboards using D3.js, Tableau, Plotly, and Matplotlib.
- Designed visual narratives to explain large datasets in meaningful ways.

Web Development

- Created and deployed full-stack web apps using React.js, Node.js, and MongoDB.
- Developed practice projects like a To-Do List, Counter App, and Blog Interface.

AI-Powered Solutions

- Built chatbot interfaces using LLMs and RAG (Retrieval-Augmented Generation) models.
- Developed a text-to-image generation platform using Generative AI, deployed on Netlify.
- Worked on CNN-based deep learning models for basic computer vision tasks.

Technical Skills

Operating Systems & IT Administration

- Windows 10/11, Windows Server (2016, 2019, 2022), M365 Office Suite
- Active Directory, DHCP, DNS, Group Policies, Exchange Online, SharePoint Online, Defender, Entra, Intune
- Domain & Workgroup Support, User Troubleshooting, Software/Hardware Installation & Configuration
- Windows/Linux Patch Management, Networking & Office IT Support, Internet & Email Support
- Cisco Call Manager (Conference Calls)

Cloud & Virtualization

- AWS, Azure, VMware/Virtual Machines, Docker, Kubernetes

Programming & Development

- Languages: Python, JavaScript, C++, C#, SQL
- Frontend: React.js, HTML, CSS, Tailwind, Bootstrap
- Backend & Databases: Node.js, Express.js, MongoDB

Data Science, AI & Visualization

- Machine Learning, Deep Learning (CNN), Computer Vision, RAG, Generative AI, Large Language Models (LLMs)
- Data Analysis: NumPy, Pandas
- Visualization Tools: D3.js, Tableau, Plotly, Matplotlib

Tools

- Git, VS Code, Postman, Netlify

Soft Skills

- Communication, Collaboration, Problem-Solving, Adaptability, Teaching, Customer Support
