

Muhammad Ahsan

MERN Stack Developer (Frontend Focused)

Islamabad, Pakistan

Phone: +92 317 5659647 **Email:** ahsan.dev.798@gmail.com

Profile

MERN Stack Developer with hands on experience building and maintaining scalable applications. Skilled in responsive UI, state management, backend APIs, and Linux-based CI/CD deployments, with experience in end-to-end features and performance optimization.

Experience

MERN Stack Developer — Machine Intelligence

Oct 2024 – Feb 2026

Islamabad, Pakistan

- Built responsive and reusable frontend components using React and modern state management.
- Designed and integrated RESTful APIs with Node.js and Express, working with MongoDB for efficient data modeling and performance optimization.
- Deployed and maintained applications on Linux servers with automated CI/CD pipelines using GitHub Actions, PM2, and Nginx; handled database migrations and automated backups via cron jobs.
- Implemented secure authentication using Clerk and JWT.
- Collaborated with cross-functional teams while adhering to security and coding best practices.

Frontend Developer — Cyber Fortify

Jan 2024 – Dec 2024

Remote

- Built UI layouts, API integrations, and reusable components.
- Participated in code reviews, debugging, and UI improvements.

Frontend Developer Internship — Sofit Consultancy

Sep 2023 – Dec 2023

Islamabad, Pakistan

- Created responsive and interactive user interfaces using React.js.
- Implemented Component-Based Design for scalability and reusability.
- Utilized Redux for efficient state management.
- Followed React.js coding standards for quality code.

Major Projects

TIB Telemedicine – MERN | Tailwind

- A comprehensive medical portal for patient records, document management, appointment scheduling, billing, and other healthcare workflows, supporting multiple user roles including Super Admin, Hospital Admin/Staff, and Patients.

MalathHelp – MERN | Tailwind

- A mental health platform allowing users to complete assessments and programs created by their therapists.

Glizzy Games – Next.js | Chakra UI | MongoDB

- A game hosting platform enabling developers to manage and publish games while providing users with an interactive interface to explore, download and play them.

Skills

Frontend: React.js, Next.js, TypeScript, Tailwind

Backend: Node.js, Express, MongoDB, REST APIs

DevOps: CI/CD Pipelines, GitHub Actions, Linux Server, Nginx, PM2,

Other: Git/GitHub, Clerk, Cloudinary, SendGrid

Education

BS Computer Science — Virtual University

2019 - 2023
