Location: Islamabad,6 road opposite metrobus station

EDUCATION

The Shaheed Zulfikar Ali Bhutto Institute of Science and Technology (SZABIST), Larkana University

BS Computer Science CGPA 2.85/4

SKILLS SUMMARY

Language: Python, Java, Javascript,Typescript, PHP,HTML and CSS

Builder Elementor, WPBakery, Divi Builder, Gutenberg and Beaver Builder

Platform. Jupyter Notebook, Visual Studio code, Pycharm, IntelliJ IDEA.Git

EXPERIENCE

WordPress Developer with 3 years of experience on Fiverr. Delivered 20+ fully responsive websites. Skilled in theme customization, plugin integration, and website optimization and Hooks use with Actions and Filters"

Rice Classifications Website: Developed a web-based rice classification system integrating Artificial Intelligence (AI) on the backend for real-time image analysis and classification of rice grains. Demonstrated effective full-stack development skills combining AI, API integration, and frontend technologies.

Data scientists: Collected, cleaned, and transformed large datasets from multiple sources to prepare for in-depth analysis and modelling. Utilised Pandas, NumPy, and SQL for data wrangling, removing inconsistencies, handling missing values, and standardising data formats.

PROJECTS

Final Year Project (FYP): AI-Based Rice Classification System

Developed a machine learning-based web application capable of classifying different varieties of rice grains based on image input.

CGPA Management System – MERN Stack Web Application

MongoDB, Express.js, React.js, Node.js, HTML, CSS, JavaScript

CERTIFICATES

Website Developer – CodeAlpha

Completed hands-on training in full-stack web development with a focus on responsive design, modern frontend technologies (HTML, CSS, JavaScript), and backend integration.Built real-world web projects and learned industry best practices for performance, accessibility, and maintainability.
