Professional Summary

PHP Developer with 2 years of experience building scalable web applications using **Laravel** and **CodeIgniter**, delivering **REST APIs**, and **CRM solutions**. Proficient in **Vue.js**, Ajax, jQuery, and **WordPress/WooCommerce** with pixel-perfect implementation. Experienced in **SuiteCRM** and **SugarCRM** customization for business automation workflows.

Work Experience

Full Stack Developer

Oct 2024 – Present

Creative Tech Solutions

Islamabad, Pakistan

- Customized **SuiteCRM** using Core PHP – custom modules, Logic Hooks, and Entry Points for business automation workflows.
- Developed **Laravel/Vue.js** customer portal for document management, property tracking, and automated email notifications.
- Built responsive UIs using **Bootstrap** and delivered pixel-perfect **WordPress** theme customization.

Web Engineer

Mar 2024 – Sep 2024

Eluxoft Technologies

Islamabad, Pakistan

- Built responsive web interfaces from **Figma** designs using HTML, CSS, JavaScript, and **Bootstrap** – achieving pixel-perfect cross-browser compatible layouts.
- Developed frontend features using **Vue.js** and jQuery with Ajax-based API calls for dynamic data handling.
- Built backend systems using **Laravel** with Eloquent ORM for database management and REST API development.

Projects

Pacitti-Jones CRM | *SuiteCRM, CodeIgniter, Laravel, WordPress, APIs*

Oct 2024 – Present

- Built a full real estate CRM integrating **SuiteCRM** with **WordPress** to manage complete property lifecycle – leads, viewings, offers, and document management.
- Automated lead assignment, offer acceptance, and viewing workflows via **SuiteCRM Entry Points** and custom email templates – syncing enquiries from **Zoopla** and **Rightmove**.
- Developed a **Laravel/Vue.js** client portal for document uploads, offer negotiation, and profile management with automated email notifications.
- Implemented **cron jobs** to auto-generate valuation and viewing leads from email accounts into CRM.

Attendance Management System | *Laravel, MySQL, Bootstrap 5, WebSockets*

Mar 2024 – Jun 2024

- Built a role-based HR system using **Laravel** for attendance tracking, leave management, and employee salary management with an dedicated accounts module.
- Implemented real-time **WebSocket** chat between employees and advance fund request workflow for financial management.

Festival Lights Experts eCommerce Store | *WordPress, WooCommerce, Stripe*

Feb 2025 – Apr 2025

- Developed a pixel-perfect **WordPress** eCommerce store from **Figma** design – custom theme development, WooCommerce setup, and image optimization plugins.
- Integrated **Stripe** payment gateway and configured automated customized order confirmation emails for enhanced customer experience.
- Deployed live site on **cPanel** hosting with full configuration and performance optimization.
