CAREER OBJECTIVE

Computer Science student at FAST National University of Computer & Emerging Sciences (NUCES) with hands-on project experience in Database-Driven Application Development, and Artificial Intelligence. Proficient in Python, JavaScript, C++, C#, SQL, and modern Web Technologies.

EDUCATION

Bachelor of Science in Computer Science | FAST National University of Computer & Emerging Sciences (NUCES) | 2023 – 2027

Relevant Courses:

Data Structures & Algorithms · Operating Systems · Artificial Intelligence · OOP · Database Systems · Computer Networks

TECHNICAL SKILLS

Python pandas · numpy · matplotlib · plotly · scikit-learn · seaborn · **SQL / DB** Oracle DB · SQL Server · SQLite · stored procedures · relational modeling
JavaScript vanilla JS · DOM APIs · React.js · Node.js
C++ STL containers · algorithms · POSIX threads · boost
C# .NET framework · WinForms · ADO.NET · LINQ
Tools Git · GitHub · VS Code · Visual Studio · Linux/Ubuntu
ML / Data regression · classification · data wrangling · EDA · Jupyter · Colab
AI Tools ChatGPT (OpenAI) · Claude (Anthropic) · GitHub Copilot · Gemini

EXPERIENCE

Recruitment Event Coordinator 2024

Eritheia Labs · FAST NUCES CFD Job Fair '24

- **Managed end-to-end check-in logistics** for company representatives and students, ensuring smooth event operations throughout the day.
- **Coordinated interview scheduling** and served as the key bridge between Eritheia Labs' hiring team and student candidates.
- **Guided candidates to relevant booths** and supported them through application procedures, strengthening the student–employer connection.

Recruitment Event Coordinator 2025

SmartHub Engineering · FAST NUCES CFD Job Fair '25

- **Spearheaded check-in and queue management** for SmartHub Engineering's recruitment booth, handling attendee verification and flow.
- **Facilitated technical interview sessions** by coordinating candidate flow and ensuring interviewers had all required materials and schedules.
- **Served as campus liaison** between SmartHub's recruitment team and prospective candidates, boosting company visibility on campus.

PROJECTS

Student Portal

Ongoing

MongoDB · Express.js · React.js · Node.js (MERN Stack)

- **Building a full-stack Student Portal using the MERN stack** featuring organized access to past papers, lecture notes, and other academic resources to support students throughout their studies.

Operating System Simulator

2025

C++ (STL, POSIX Threads) · Linux/Ubuntu · Shell

- **Modeled CPU scheduling algorithms (FCFS, SJF, Round Robin)**, memory management, IPC, and deadlock handling on a Linux/Ubuntu framework.

Sudoku CSP Solver — AI Project

2026

Python (NumPy, Matplotlib) · Backtracking · AC-3 · Jupyter Notebook

- **Built an AI solver using backtracking search and AC-3 arc-consistency**, significantly pruning search space; visualized constraint propagation with Matplotlib.

GameStore — Database-Driven Desktop Application

2025

C# (.NET, WinForms, ADO.NET) · Oracle DB · SQL · Visual Studio

- **Designed a normalized Oracle DB schema with stored procedures**, reducing query latency by 20% via an optimized CRUD layer with referential integrity.
- **Built a full-featured C# desktop UI** for browsing, purchasing, and managing games with real-time inventory updates and sales reporting.
