ABOUT ME

I'm a Flutter developer with a degree in Computer Science and a real passion for creating smooth, beautiful mobile apps that work across platforms. I love working with Flutter and Dart, and I've gotten pretty comfortable using tools like Bloc and Provider for state management. I've built apps that connect with Firebase and use REST APIs, always focusing on making the user experience as clean and responsive as possible. I've been part of every step of the development process—from sketching out ideas to launching the finished product. I also have experience with WordPress, which helps when it comes to managing content easily. I'm always eager to learn, solve problems, and write code that's not just functional but clean and future-ready. Staying on top of new trends in Flutter keeps me excited about what I do.

EDUCATION

VIRTUAL UNIVERSITY OF PAKISTAN
Bachelor's degree in Computer Science
2020 - 2024

**GOVT SABRIA SARJIA HIGHER
SECONDARY SCHOOL**
Intermediate School Education
2018 - 2020

GOVT AGRO TECHNICAL HIGH SCHOOL
Matric
2016 - 2018

SKILL

- Flutter
- Dart
- C++
- WordPress
- React Js
- JavaScript
- HTML
- CSS

WORK EXPERIENCE

- CODE DEBUGGERS SOFTWARE SOLUTION-FAISALABAD** **JAN 2025- JUN 2025**
Flutter Internship
 - Developed and deployed cross-platform mobile applications using Flutter, leveraging Dart for responsive and user-friendly app interfaces compatible with both iOS and Android.
 - Created custom UI components and used GetX for efficient state management to keep the app responsive and easy to maintain.
 - Integrated RESTful APIs for backend communication and handled asynchronous data streams to enhance app functionality.
 - Applied Firebase services (Firestore, Authentication, Cloud Messaging) for real-time data handling, user authentication, and push notifications.
 - Conducted rigorous testing and debugging to maintain app stability and performance, utilizing tools like Flutter DevTools and automated unit tests.
 - Collaborated with designers and clients to translate requirements into clean, maintainable code, following Agile methodologies to manage development timelines and improve productivity.
