PROFESSIONAL SUMMARY

DevOps Engineer with intermediate years of hands-on experience architecting and maintaining CI/CD pipelines, containerized microservices, and cloud infrastructure across GCP, Azure, and AWS. Reduced deployment times from hours to minutes using Docker and Kubernetes on government-linked production systems. Comfortable operating across the full software delivery lifecycle from infra provisioning and pipeline design to LLM integration and real-time monitoring dashboards. Currently pursuing B.S. in Information Technology at Air University (Expected 2027).

EDUCATION

Bachelor of Science, Information Technology (In Progress)

Air University, Islamabad, Pakistan • Expected 2027

Relevant Coursework: Operating Systems · Computer Networks · Database Systems · Algorithms · Software Engineering

TECHNICAL SKILLS

DevOps & CI/CD: Docker (multi-stage builds) · Kubernetes · GitHub Actions · CI/CD Pipelines · Linux · Bash · Shell Scripting

Cloud Platforms: Google Cloud Platform (GCP) · Microsoft Azure · AWS · Firebase Hosting · Google Play Console

Infrastructure: Container Orchestration · Cloud Run · GKE · Azure DevOps · Infrastructure as Code · Multi-cloud Deployment

Monitoring & Security: Log Ingestion Pipelines · LLM-based Threat Classification · Real-time Alerting Dashboards · Incident Response

Backend & APIs: Python · Flask · Node.js · RESTful APIs · Firebase (Auth, Firestore, Cloud Functions) · MongoDB · MySQL

AI / LLM Ops: LangChain · Pinecone RAG · LLM Pipeline Integration · Prompt Engineering

Frontend (Supporting): React.js · Redux · React Query · TypeScript · Tailwind CSS

Version Control: Git · GitHub · Branching Strategies · Pull Request Reviews · 435+ contributions

EXPERIENCE

DevOps Engineer & Project Lead | Dassoft, NASTP

Jun 2025 – Sep 2025

National Aerospace Science & Technology Park Cybersecurity Division

- Reduced production release time from hours to minutes measured by deployment frequency and lead time by engineering Docker and Kubernetes CI/CD pipelines for an LLM-powered Security Operations Center platform on Azure and GCP.
- Improved SOC analyst mean-time-to-detect (MTTD) by integrating automated log ingestion and LLM-based threat classification into live workflows, surfaced via a React real-time alerting dashboard with AI-generated incident summaries.
- Delivered full cloud infrastructure provisioning within a 3-month timeline with zero missed sprint deliverables by managing a 4-person team through structured Agile sprints, Git code reviews, and weekly deliverable cadence aligned to senior engineering roadmap.
- Accelerated team onboarding and reduced knowledge silos by researching containerization strategies and producing deployment architecture documentation adopted by the full engineering team.

Software Engineer & Platform Lead | Siberkoza International, NASTP

Sep 2025 – Apr 2026

National Aerospace Science & Technology Park Government-Linked Innovation Hub

- Reduced page load time by 40% measured by Lighthouse performance score by architecting and shipping 5 simultaneous live products with component-based React and Vite, utilizing code splitting, lazy loading, and bundle optimization.
- Maintained a 3-minute end-to-end CI/CD deploy cycle across 5 live products by building Docker containerization and GitHub Actions automation pipelines deployed on Google Cloud Platform.
- Eliminated stale-render failures under concurrent load across 10+ pages by designing a unified Flask and Firebase backend with a single RESTful API layer, Redux state management, and Firestore real-time listeners.
- Achieved zero service interruption during mid-cycle Firebase credential rotation by coordinating structured change management documentation across 6 Agile delivery cycles with cross-functional stakeholders.

- Reduced React Native mobile deployment friction by 100% (Expo to production) by executing full bare CLI migration re-linking 12 native modules, configuring FCM push notifications, and producing a Play Store-ready Android App Bundle.

Software Developer & Technical Consultant | Zenatic Services

Jan 2025 – Aug 2025

- Reduced average API response latency by 30% across 4 client platforms measured by Postman benchmarks by optimizing Firebase Firestore query patterns and eliminating redundant API call chains.
- Achieved 5-star client ratings on all 4 delivered applications by maintaining rigorous Agile workflows, peer-reviewed Git practices, and structured revision cycles with zero scope creep on final deliverables.
- Built and launched production company website zenaticservices.com end-to-end, managing full deployment pipeline with Firebase Hosting and CI/CD configuration, delivered on schedule.

CRUMBLE | Dispatch Lead and Operations Manager

June 2024 – September 2024

- Supervised dispatch operations for 500+ daily deliveries- optimized routing logic and team coordination, improving operational efficiency by 85% within 90 days while leading 8-person team
- Onboarded and trained 4 new team members; developed standard operating procedures that reduced average ramp-up time from 2 weeks to 5 days

PROJECTS

DSOC(LLM-Powered Security Operations Center)

Docker · Kubernetes · Azure · GCP · Python · React

- Designed and led automated log ingestion pipeline with LLM threat classification and real-time analyst dashboard; managed 4-person team across full 3-month SDLC.

Siberkoza Platform(Multi-Product CI/CD Infrastructure)

React · Vite · Flask · Firebase · GCP · Docker · GitHub Action

- Architected CI/CD infrastructure for 5 simultaneous live products from zero web, mobile, kiosk, admin, Smart Bench with 3-minute deploy cycle and LangChain RAG integration.

Siberkoza Mobile React Native Bare CLI Migration

React Native CLI · Firebase SDK · FCM · Redux · Flask · CI/CD

- Executed complete Expo-to-bare-CLI migration: re-linked 12 native modules, configured push notifications, produced Play Store Android App Bundle with full CI/CD pipeline.

FULL-STACK BLOG PLATFORM

React, Node.js, Express, MongoDB, Multer, Material-UI, JSON Web Token

- Authentication, image uploads, rich text editing, and fully responsive layout- complete platform built end-to-end

Leadership and Activities

U.S. EMBASSY ISLAMABAD, PUBLIC ENGAGEMENT UNIT

Islamabad, Pakistan

Focus Group Participant- Artificial Intelligence and Digital Entrepreneurship

September 2025

- Selected as young professional to participate in structured discussions on artificial intelligence,digital workforce , and barriers to entrepreneurship in Pakistan; contributed youth and technology perspectives alongside global partners

SIBERKOZA AU Mentor- Internet of Things Bootcamp

August 2025

- Taught IoT fundamentals to 15+ students aged 12–15 across multi-day sessions covering Arduino, Cisco Packet Tracer, and Tinkercad; designed and supervised team-based smart city circuit projects

MICROSOFT LEARN STUDENT AMBASSADORS, AIR UNIVERSITY

Rawalpindi, Pakistan

Student Ambassador

September 2024 – Present

- Organized technical workshops and community learning events for 100+ students; built peer mentorship programs and expanded professional network across the Microsoft ambassador community

AUIS SERAH FEST, AIR UNIVERSITY Deputy Head- Media, Marketing, and Awards

February 2024 – Present

- Directed team of 10+ across media production, marketing campaigns, and awards coordination for high-profile university events; established schedules, delegated responsibilities, and ensured on-time delivery of all event components
