

Khizer Shah

SOFTWARE ENGINEER

• Islamabad-Pakistan • khizershah493@gmail.com • +923173555632

Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with expertis in MERN,Next.js,NestJS, React Native,and DevOps tools like AWS Docker. I build scalable apps, automation systems,lot based Esp8266 modules and WhatsApp API bots with clean architecture and modern UI/UX.

[NEXT.JS, REACT NATIVE, FIREBASE, MONGODB,POSTGRES SQL PRISMAORM, EXPRESS, AI AUTOMATION , DEVOPS

WORK EXPERIENCE

FullStack Developer / Devops

12/10/2022 - 2026

- *Developed content websites using Next.js, React, and modern UI frameworks. Built a coworking reservation system with real-time booking, Firebase integration, and secure backend using NestJS/Express. Integrated WhatsApp API chatbot with Google Sheets automation for lead management. Created mobile features and UI components*
- *working on Esp 8266 modules arduino board creating real time fuel pump transaction analytics dashboard*
- *React Native connected to Firebase services. Managed and mentored 2 interns, guiding them on MERN, Next.js, and deployment workflows. Implemented Docker, CI/CD pipelines, and optimized deployments for smooth delivery across project Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Linux, GitHub Actions, CI/CD Pipelines*

SKILLS

- **Full-Stack:** Next.js, React, Node.js, NestJS, TypeScript, Tailwind CSS.
- **Backend & DB:** PostgreSQL, MongoDB, RESTful APIs, JWT, Prisma.
- **DevOps & IoT:** Docker,Kubernetes,Prometheus, Grafana Monitoring AWS , CI/CD, Linux, ESP8266 (Arduino).
- **Tools & Other:** Git-Github , Postman, Web3/Solidity, Nginx, Docker Compose.

PROJECTS

AI DevOps Engineer (SaaS Platform) | Next.js, OpenAI API, Docker, GitHub Actions, AWS

- Architected an AI-driven SaaS that automates CI/CD pipeline generation and cloud infrastructure Integrated (LLMs) to analyze repositories and generate optimized Dockerfiles and Nginx settings.
- Built a subscription-based dashboard to manage automated deployments on AWS EC2
- github Repo-link : <https://github.com/Khizer-shah88/Ai-Devops-OpsMate-SaaS>

IoT Fuel Monitoring & Real-Time Analytics | ESP8266 (ESP-01), NestJS, Prisma, PostgreSQL, Arduino

- Developed an end-to-end IoT system for real-time fuel nozzle monitoring and transaction logging. Engineered custom firmware for ESP-01 modules to handle high-frequency data transmission via serial communication.
- Built a high-concurrency NestJS backend to process sensor data and visualize consumption patterns for pump operators. Github Repo-Link : https://github.com/Khizer-shah88/Fuel_analyser

Developer Hub — Premium Digital Agency Platform

- Developer Hub is a production-ready digital agency platform built for a premium engineering studio that partners with founders and product teams. The site showcases services, portfolio work, performance metrics, and enables client inquiries and appointment bookings — all in 1
Live : developershubcorp.agency.

Drive Hub – Car Rental Mobile App | React Native, Firebase, Redux, Google Maps API

- Built a cross-platform mobile application for vehicle booking with real-time availability and location-based searching.
- Integrated Firebase for cloud-hosted database management, real-time sync, and secure JWT-based authentication.
- Source Code: github.com/Khizer-shah88/Drive-Hub

Full-Stack Food Delivery Platform (BurgerBite) | Next.js, MongoDB, Node.js, AWS EC2, Microservices :

- Developed a scalable food delivery ecosystem featuring a real-time order tracking system and a secure admin panel.
- Deployed using a Microservices architecture on AWS with Docker containers for improved and scaling.
Live Demo: burgerbite.duckdns.org

Commercial Client Projects | React.js, Tailwind CSS, Vercel, SEO Optimization

- Rabian Kabab: Full-stack ordering system with a custom-built management dashboard. [View Project](#)
- Quetta Chemical Services: Performance-optimized business landing page focused on lead conversion. [View Project](#)

Automation: AI Automation, WhatsApp API Bots, Webhooks Other: JWT Auth, Realtime Apps, Clean Architecture

CERTIFICATIONS & TRAINING

- OGDCL Pakistan (Oil and Gas Development Company Limited)
Completed professional internship/training program in (IT System Department)
- DevelopersHub Corporation
Focus Areas: Full Stack Development / DevOps / AI / Backend Core Fundamentals)
- Google Prompting Essentials — Google
AI Prompt Engineering, Generative AI Workflows, LLM Interaction, AI Productivity
- Docker Foundations Professional Certificate — Docker
Great for backend/devops resumes (Docker Training)

EDUCATION

Bachelor of Science in Software Engineering | 2023-2027

The Islamia University of Bahawalpur /

Also studying at Arfa Kareem Software Park Lahore
